Atelier del Gelato — the sitting with Evo

Prepared 2026-11-02 · for the week of 2026-11-02 · about 90 minutes · Menelaos asks, records verbatim, Evo's words only

Everything in Stage 1 waits on this hour: the diagnosis signature, the brand book becoming final, the persona format, the proposal. Record the answers in his words, in Bulgarian if he speaks Bulgarian; do not paraphrase.

Part 1 — The four questions (15 min)

#	Question	Answer
1	What are you trying to build?	
2	What stage are you at, and what is the timeline? When do the next ateliers open, and where?	
3	Which partners are already engaged? The identity designer's name. An architect or interior partner for the next atelier?	
4	What outcome would make this engagement worth the investment?	

Part 2 — The owner interview, eleven questions (45 min)

What Brand Book v3 already commits him to is in the right column, for Menelaos only. Do not read it to him; ask the question and write what he says.

#	Question	Answer	v3 already says
1	What do you love about this business, and why?		the craft; the moment a guest is noticed
2	What do you dislike or hate, and why?		dessert as a transaction; "Next!"; the rushed counter
3	Where do you bring the most value to your guests?		a pause in which someone notices you and what you are celebrating
4	The one thing you would change about this industry?		service; the category's complaint is people, not product
5	Why is this market a great space to be in?		Sofia has no gelato brand with an emotional idea; tiramisu is only now emerging
6	Social media: positives and negatives?		real guests, real notes; no posed perfection, no product-only heroes
7	The purpose of your existence, aside from money?		happiness is an attitude; everyday moments deserve to be noticed
8	What is important in the way you do business?		fresh every day, the Italian way, no shortcuts
9	What do your guests need protecting from?		being processed; empty mass-market desserts; joyless "healthy" options
10	The most pressing issues in the world today?		nothing on file
11	What are you passionate about?		nothing on file

Then: which of the four values (from v3) does the team already live, and which are still aspirational?

Part 3 — Five decisions (20 min)

#	Decision	The practice recommends	Evo decides
1	Stage 1 as a **full rerun** that re-interrogates the October book, or a **revision** of Brand Book v3?	full rerun, as he asked; he must agree to seeing October's conclusions questioned	
2	**Giulia**: a disclosed AI host with face and voice, or real team on camera with Giulia as the written voice only?	real team + written voice; it sits inside the value "Stay human" and needs no disclosure set	
3	Editorial tagline: keep "Italian joy crafted daily." or move to **"What are we celebrating today?"** (lock-up "Happiness is an attitude." stays)	move; "joy every day" is Doppio's territory per his own v3 §2.2	
4	**"Baci"** on the Instagram handle and the Google listing: remove now, and which print / QR codes change with it?	remove, per v3	
5	**Identity designer**: who, by when; and does he confirm what the brand is indifferent to (Annex B §4)?	name a candidate; the practice scores candidates on six criteria	

Part 4 — Facts only he holds (10 min, yes/no or one line)

Fact	Answer
Legal entity names: shop company, Lab company	
Prices: atelier menu, B2B price list (where is the current sheet?)	
Allergen matrix; the Lab's written gluten-free confirmation	
Legal serving age and wording for the Aperitivo line	
Website: exists? URL? who maintains it	
TikTok account: exists?	
Meta Business Manager, ad account, pixel; Google Ads id	
Seasonal menu switch dates; Christmas hours 24–28 Dec	
Ring Mall counter: address, hours, counter format, mall contact	
The brand's view on money, growth and mistakes, in his words	

Close (5 min)

- Scope page and timeline read aloud; Evo confirms in writing (one dated line) or names what to change.
- Brand Book v1.0 draft: he has the PDF; signature after he reads it, target 2026-11-20.
- Next meeting: the proposal.

Answers go into `open-facts.md` rows 1–14, 20–26, 30, 35, 36 and `diagnosis.md` §3; the account manager files them the same day.
